Alexander Vikenfalk, Junior Web Developer

Nostitzstraße 43, Berlin 10961. Germany
alexander.wikenfalk@gmail.com - 0178-2964693

EMPLOYMENT HISTORY

Apr 2018 – Current
Berlin, Germany

Web Developer, Freelance

Currently working with Curry 61 as the customer. I'm creating their new webpage with focus on browser support, responsiveness, simplicity and performance. Therefore I've chosen to work with as few frameworks as possible: HTML, CSS and JS.

Jan 2018 – Mar 2018
Berlin, Germany

Junior Web Developer, Petitcode

Petitcode is a small Berlin-based startup that connects clients with developers. Since starting there, I've mainly continued working on the project I did there as an intern. Common tasks included coding react.js, working with the backend via REST, designing (UX/ UI) and deploying to the server (CentOS).

Oct 2017 – Dec 2017
Berlin, Germany

Intern, petitcode

Petitcode is a small Berlin-based startup that connects clients with developers. I did an internship there where my job was to port an existing Android app called "Find Some Buddy" on the web. I worked mostly by myself (but sometimes also with their backend technician) with creating, designing and deploying the app to the web. Since I got the freedom to choose the language myself, I decided to build it with react.js since it's the language I feel most proficient.

Feb 2017 – Mar 2017
Berlin, Germany

Intern, Kilostorm

I did my first internship at Kilostorm which is a small startup located in Berlin. They had a couple of totally different projects running at the time. I worked one of one of their projects which was a web site for comparing different animal insurances.

i designed and coded modules in html, css and jquery which I integrated with Wordpress themes.

Mar 2012 – Mar 2016
Malmö, Sweden

IT Support Technician (1st and 2nd line), HP

Daily tasks included troubleshooting, ticket handling and remote support of client systems (mostly Microsoft based platforms).

EDUCATION

Aug 2016 – Jan 2018
Stockholm, Sweden

Lernia AB, Vocational University degree

Frontend Development program with focus on designing and creating web apps with React.js and Redux.

Aug 2016 – Jun 2017
Stockholm, Sweden

Lernia AB, Vocational University degree

Backend Development program focusing on creating APIs in C# and the .net platform.

Aug 2009 – Jun 2011

Kristianstad, Sweden

Högskolan Kristianstad, Associates degree

Network Engineering program where i learnt how to set up network infrastructure and configure Microsoft based services.
